

Collage Project

Date due: Monday April 11th

Dear Families,

For our final family project this year, you and your child will be creating a collage of their life. This is such a neat project for the students to do and share with the class. We will provide the paper, you provide the pictures! ☺

First, help them select important moments in their life. Each event should have a picture, be labeled with the event, and include the date. You can attach photos or draw pictures for each one and decorate any way you'd like.

The first picture should be the day they were born. The last picture should be current. Some ideas: first word, first tooth, first steps, first haircut, first day of preschool, vacations, visits from relatives, first day of Kindergarten... anything like that.

Finally, think of a way you can assemble the events all together in a collage form. Projects will be displayed on a wall, please use the paper provided or paper of the same size. All collages should have a title including the author displayed somewhere as well. For example, "Kevin's First Five Years" or "Eileen's Timeline of Favorite Memories."

Be sure your child practices what they will say about each event when they will present them to the class. Family projects this year were intended to not only be a fun way to spend quality time together as a family, but to be creative, feel proud of the final project, create a darling Kinder keepsake, AND learn to sit in front of the class and share their projects as a presenter. They've come a long way since our first sharing! They are so confident and articulate about their projects when sharing! I hope you've enjoyed our projects as much as I have!
